

The Inside Soup

April 2024

Mojo Spotlight

Following on from celebrating Mojo Soup's 15 year anniversary last month, we are equally excited to share that we have moved to a new and improved office space. The new space has been in the works for some time and was a necessary investment in both floor space for all the new Mojo Soupians, but also our focus to create a collaborative and connected environment for our team and customers.

We have gone from a 1 meeting room office with a 15 person capacity, to a 5 meeting room, 24 permanent and 10 hot desk capacity. To celebrate this, and our 15 year birthday, we hosted a ribbon cutting ceremony, unveiled some special art works, and enjoyed some tasty food and drinks with our Mojo Soup team and partners, and our valued associates. You may be wondering where this new space is, and whilst there is another story behind this answer the new address is unchanged, we are still at Level 1/200 Creek Street, but we moved next door!

Now that we have achieved this important step in our journey, our focus again shifts to the year ahead to explore how we can leverage what we have created over the past 15 years, and to continue to push ourselves to connected brilliance. Part of this focus is continuing to deliver and improve our customer experience through our delivery performance, which is made possible with our customer experience program. Your (our customers) feedback during CX meetings is the most important measure we have as a business to gauge our performance, it is what drives us to improve and invest in capability, approach, and improved service offerings.

It's not often we get to offer public thanks to our network of amazing customers, so this month we are taking the opportunity to thank you all for being so loyal, honest and trusting, without you this 15 year milestone, our new office, and our optimistic future outlook would not be possible - thank you!

Project Spotlight

For this month's project spotlight we're taking the opportunity to present a useful and significant tool in our product portfolio - Mojo Folio. Mojo Folio is our signature advanced project and portfolio management solution, and is built upon the latest Microsoft Project application set, leveraging the Power Platform.

We are proud to be a trusted project management solution provider. Our rich legacy and extensive experience have inspired us to continually innovate, striving to craft a product which captivates our customers and end users, but also redefines industry standards, enriching user experiences at every turn. We are excited to push the envelope with "what's possible" and set new standards via our delivery approach.

What we offer is unique. In fact, it has to be. It's tailored to accommodate our customers' diverse requirements and varying needs, capabilities, and future objectives. Our uniqueness lies in the fact that we provide a base configuration suitable for various customer needs. For instance, it caters to those who are just starting out in project management and seek a tool to enhance their capabilities and processes. On the other hand, it also caters to customers who require us to customise and configure our product to handle their most intricate processes. This could involve automating inputs and outputs, implementing logic to minimise human intervention, generating comprehensive reports to meet stakeholder requirements, or integrating seamlessly with existing business applications and data. We've encountered a wide range of challenges, and Mojo Folio has proven its ability to handle them all.

Our approach to delivering Mojo Folio has continuously improved with each implementation. We consider customer feedback and experiences as crucial inputs to refining our 'Mojility' (our delivery method). However, we're not hitting the brakes just yet. We're dedicated to further enhancing both the product and the delivery experience to ensure that every engagement reflects our commitment to meeting customers' needs, both technically and professionally.

As our journey progresses, we're excited about the next steps for Mojo Folio. We're currently working on integrating an AI component, which we'll unveil once we have a proof of concept to demonstrate its capabilities. We believe this addition will further enhance the value of our unique offering. As we propel forward in our mission to revolutionise project management with Mojo Folio, we invite you to be a part of the journey. Your feedback and experiences are invaluable to us as we strive for excellence in every aspect of our product and service delivery.

Community Spotlight

Some of our more daring and adventurous Mojo Soupians recently conquered the RAW Challenge - another rigorous obstacle course experience!

Tony, Maddie, Alex and Dave banded together and despite the difficulty of the obstacle course, they were all up for the challenge and their spirits were high the whole way through. It was definitely a more challenging obstacle course than the foam run - but that's what made it so much fun.

As they trudged through the thigh deep mud, Tony almost lost his shoes more than once - and unfortunately, actually did lose his sunglasses as he whooshed down a 40 metre slide straight into a pool of... You guessed it...mud!

Maddie loved seeing her colleagues outside the usual work environment and working together to complete obstacles - noting that Dave has a LOT of energy!

Dave loved the massive slip and slide and the vibrant atmosphere created by music blasting along the course.

As a community we love to seek new adventures together, the memories created at events highlight the importance of community, teamwork, and resilience.

Soupien Du Jour

Jared is our Insights and Analytics Practice Manager, AI and Generative AI specialist and data expert. He's always ready to help organisations tackle data challenges and unlock their potential.

Let's get to know Jared!

What's something we wouldn't see on your resume?

As a part of having my house recently renovated, I have taken on painting the inside and outside of our home to try and save a bit of money. While I have enjoyed picking up skills in this area including being pretty good at cutting in, and believe that I have done pretty good job overall, I do think that it has reconfirmed that I have picked the right career path in life using tech and data rather than paint brushes (and sanding...).

Most exciting thing about joining Mojo Soup?

Joining a collaborative and exciting business where everyone is keen to have a go and support each other. I have also been feeling very refreshed on being able to be super creative in coming up with our service offerings and building our capability in the Insights and Analytics team to bring some really cool things to market that can help Mojo's current and future customer's fuel and drive their growth using data and AI.

Last concert you went to?

I would like to go to more and I have realised the last one was last June however it was enough to fill a year. I went to see Brisbane band The Gin Club at the Zoo who celebrated 20 years together and played for over 3 hours.
