Mojo Spotlight

Happy new year all! We hope everyone has had an amazing start to 2026 and is ready for an epic year ahead.

We have had a massive start to 2026. We've been making waves in the Microsoft Dynamics space with some awesome CRM projects for Health and Transport departments here in Queensland.

We're also pleased to announce our latest accelerator to deliver Microsoft Business Central (in record time) through our partnership with DIY-ERP.

Where traditional ERP projects take years, cost millions, and leave businesses with underwhelming results, our 16-week ERP program uses a proven methodology through intuitive step by step wizards and proven templates which have driven over 330+ successful implementations and delivered best-practice ERP that works, without the chaos or cost blowouts.

The approach is simple:

- ERP implemented in 16 weeks.
- Businesses adopt best-practice processes, instead of over-customising.
- Self-sufficient by design, with ongoing support available
- Customers walk away owning their ERP with no lock-in contracts.

Ready to own your ERP future? [Book a free 30-minute diagnostic](#) with one of our ERP specialists and see how our accelerator can transform your business in just 16 weeks.

Project Spotlight

A water utility company identified growing limitations in its existing inspection solution that restricted access to data, offered limited system integration, and produced unreliable PDF outputs. Field teams needed a more flexible, mobile-friendly way to capture inspection information. The organisation also required better visibility and seamless flow of data into core systems.

Mojo Soup was engaged to design and deliver a mobile e-forms solution to demonstrate how mobile inspections could be digitised and workflows streamlined. Working collaboratively with the organisation, Mojo Soup designed and built a user-friendly, customisable forms solution optimised for tablets and mobile phones. The platform supports both online and offline operation with reliable synchronisation, enabling inspections to continue uninterrupted in the field. Conditional logic and dynamic workflows were also introduced to mirror real-world inspection processes, while structured data capture with full audit history improved compliance and created opportunities for future innovation.

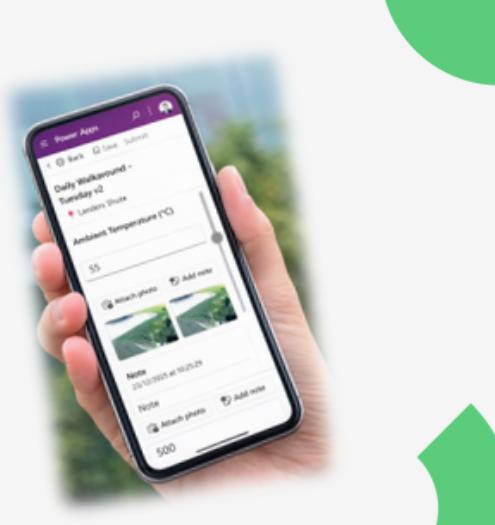

The solution enables management of a controlled 'bank' of questions that can be distributed and leveraged across multiple forms in multiple locations, while at the same time enabled aggregated responses across all instances of the controlled questions.

The solution showed how modern digital forms and mobile workflows can transform field operations by reducing manual effort, improving data accuracy, and unlocking real-time access to operational insights for smarter, data-driven decision-making.

If your organisation is facing similar challenges and is looking for a solution, Mojo Soup can help. [Get in touch with our team](#) to explore how we can design a tailored digital solution to streamline your workflows and turn your data into a powerful operational asset.

The screenshot shows the Supervisor Dashboard of the e-Forms Management App. Key statistics are displayed: 0 Forms Due Today, 0 In Progress, 3 Overdue, and 0 Awaiting Review. Below these, a table shows Form Assignments with three entries: 'Daily Walkaround - Turnkey x2' assigned to 'Landers Shure Operators' with due dates 23/12/2023, 30/12/2023, and 05/01/2024, all marked as 'New'. A 'Submission Review Queue' section shows 'No submissions awaiting review'. At the bottom, a 'Site Overview Map' displays a satellite view of a green landscape with several inspection points marked with red and blue icons, including 'Landers Shure WDP', 'Landers Shure', 'Landers Shure 2', and 'Landers Shure 3'.

Community Spotlight

Our very own Daniel Monger took on a new side hustle, taking time away from Power Platforms during the holiday break to assume a new, undercover role as Mr. Claus.

If you are a Brookhaven resident, you may have caught Dan out on Ullman Oval where families enjoyed fun activities including a snowman food truck, face painting, a festive scavenger hunt, and live music from the Freedom Train Choir.

We absolutely love seeing our Soupians out in their communities, bringing people together just as we do here at Mojo Soup with our customers. It's the Connected Brilliance that we can't get enough of.

We hope that everyone had a safe, joyous, and restful holiday break with their loved ones. If you haven't yet seen our annual holiday email, be sure to check it out below - it's not one to miss! Though it may take you a second or two to recognise some of our team members...
