Mojo spotlight

This week, our Practice Managers, Jared Bagnall and Tony Gray attended the Data + AI World Tour in Sydney, where the message was loud and clear: successful AI starts with strong data foundations.

Across customer stories from Suncorp, NAB, Fonterra, Telstra and Queensland Academy of Sport, the event shared how centralised, well-governed data unlocks real impact, from better diagnostics and supply-chain visibility to faster insights and improved customer experiences.

New capabilities like AI/BI, Genie Spaces and low/no-code Agent Bricks also showed how quickly organisations can move beyond dashboards to more intuitive, conversational ways of working with data.

A key theme echoed throughout the day: you can't skip the basics. Organisations that invest early in data quality, governance and scalable platforms are those able to move fast and innovate safely.

Whether the US Department of Defence processing petabytes securely or Sydney Water modernising public services with AI-driven apps, the examples were impressive and wide ranging.

If you're looking to accelerate your AI journey or want to future proof your data architecture ready for whatever comes next, reach out to our Data and AI Practice Manager, Jared Bagnall.

Project spotlight

If you're looking at options to migrate from Project Online quickly and cost effectively to a Microsoft based PPM solution, we have the solution.

If you're looking to avoid 12 – 18 months of gathering requirements, listening to vendor pitches, procurement approvals and delays in implementation, talk to us about Mojo Folio. We've just built and implemented one for a client in Queensland in 10 weeks.

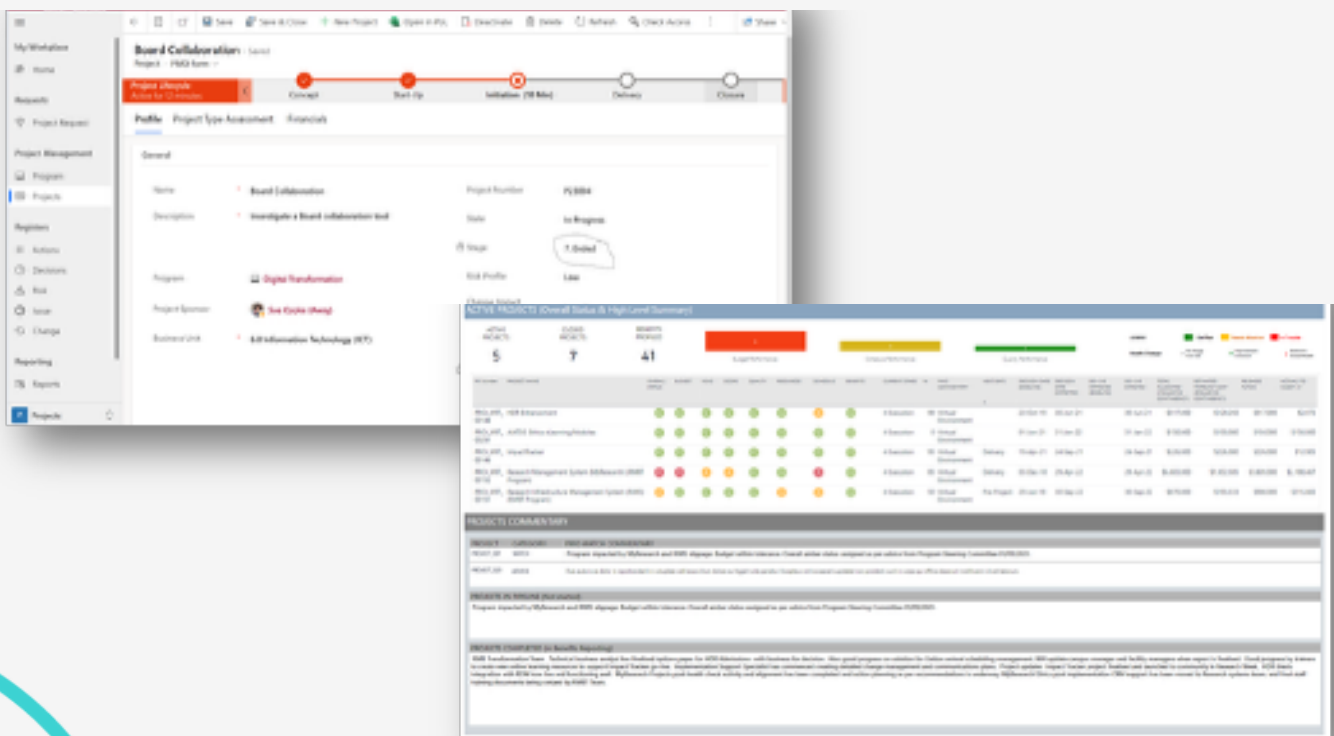

Easier, faster and more cost effective than going to market, Mojo Folio, uses the PPM licence you're already paying for.

Did you know...

- Planner Premium is included in your Project Plan 5 subscription
- Power Platform can replace your project detail pages and registers
- Migration tools from partners like Mojo Soup already exist
- Transition and training is fast with familiar Microsoft UI

If you're looking for an alternative upgrade option, we've got the solution – get in touch below.

Community spotlight

We recently hosted Brisbane's biggest Databricks User Group event yet, alongside co-organisers Beth Roland and Wilbur T. The energy in the room made it clear just how rapidly Data & AI are transforming a range of industries, from elite sport to microbiome science.

Queensland Academy of Sport's Jack Fahey-Gilmour and Gurleen Kaloti shared how they are using Databricks to build a data-driven edge as we hurtle towards the Brisbane 2032 milestone. Yadveer Grewal from Microba showcased how Databricks is accelerating their journey toward richer insights and next-generation therapeutics.

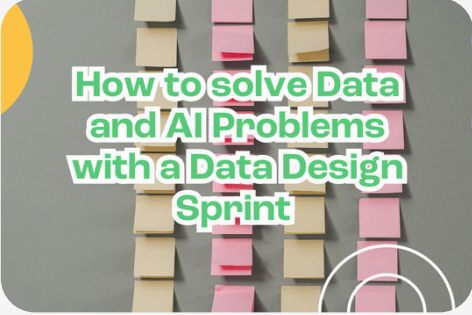

The night wrapped with a standout demo, giving everyone a hands-on look at how AI/BI Dashboards, Genie and Databricks One are redefining analytics capability. There's no doubt that modern data platforms are more than a tech stack, they're a mindset and a fast value creator when you get it right. If you're thinking about creating a data architecture which flexes with your needs and is AI ready, talk to us.

A huge thank you to everyone who joined us and helped close out the year with such momentum. It's exciting to see the Brisbane Databricks community continue to grow, connect and innovate and we're so proud to be part of that journey.

In case you missed it
